

Drucken Sie diese Schablone als **DIN A4** Dokument aus in der „**tatsächlichen Grösse**“ ohne Skalierung oder Seitenanpassung. Überprüfen Sie den **Testbalken** von 10cm bevor Sie Ihre Ringgrösse messen.

Die Zahl über dem Kreis bezeichnet den inneren Ringumfang sowie die Ringgrösse.

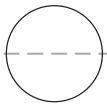

Falten Sie das Papier an der gestrichelten Linie und schneiden sorgfältig den Halbkreis aus. Jetzt können Sie die Ringgrösse messen. Achten Sie darauf, dass der Ausschnitt satt sitzt und über dem Fingerknöchel etwas spannt.

Oder Sie legen einen passenden Ring auf die Ringschablone und vergleichen die Innendurchmesser des eigenen Ringes mit der Schablone.
